BRAYDEN BERMAN

Growth & AI Automation · Builds AI-powered marketing tools · SEO / AEO

Waterloo, ON · (647) 991-6006 · braydenb945@gmail.com · bberm.work · linkedin.com/in/brayden-berman-907437337 · carlens.ca · github.com/Bermmm

SUMMARY

Marketer who builds the tools behind the growth. Built CarLens.ca solo with Claude Code: an AI listing analyzer, 250+ programmatic pages, a 7-tool calculator suite on government open data, and an open-source Search Console tool. Turns slow manual work into working software, then checks in Search Console and GA4 whether it moved the numbers.

EXPERIENCE

CarLens — Founder, Product & Growth | carlens.ca · Waterloo, ON — **2025 – Present**

- Built and launched an AI tool that turns a Canadian used-car listing into a pricing, risk and negotiation report, combining LLM analysis with live recall lookups and comparable-listing data. Own product, build and go-to-market solo.
- Built a **7-tool car-cost calculator suite** (lease, loan, fuel, affordability) with a data script that turns **12K+ official NRCan fuel ratings** into a lookup, covered by 322 automated tests. Google indexed it within days and the lease calculator entered the **top 10**.
- Shipped **250+ programmatic make/model/year pages**; over 3 months, average Google position improved from **~26 to ~12** and average daily impressions grew **28%** (6.5K impressions across 699 queries).
- Wrote answer-first content for AI search; earned **415 impressions in Google AI features** (AI Overviews / AI Mode) in 3 months.
- Ran Meta/Instagram ads on **~$1.5K** of spend and produced the creative; one organic product video reached **160K views**. Removed the pre-scan account gate and built Klaviyo activation flows.

Freelance — SEO / AEO & Web Consultant | GTA home services · Remote — **2025 – Present**

- Sent **300+ personalized cold pitches** to GTA trades businesses, each with a custom landing-page mockup as the hook.
- Low response led to prototyping GetSurfaced, a free audit showing a business where it's missing from Google and AI answers, as a stronger opener.

Current Media — Web Designer & Content Producer | Waterloo, ON — **2025 – 2026**

- Designed and built the agency's website end to end: creative direction, visual identity, scroll animation and a mobile-first build.
- Set up a Sanity headless CMS so non-technical staff publish copy, work and case studies without a developer.
- Produced and edited 4 promotional videos for the site, social and client pitch decks in Adobe Premiere Pro.

Zauber International Leasing — Digital Marketing & Web Coordinator | Vaughan, ON — **2023 – 2025**

- Built and ran the WordPress site for a lead-generation automotive leasing and finance business.
- Coordinated 3 multi-platform campaigns with the sales team, tracking results and adjusting targeting to improve lead quality.
- Wrote the brand positioning, messaging and site copy that moved a referral-only business onto digital channels.

PROJECTS

gsc-striking-distance (open source, Python) — reads a Search Console export and ranks the pages closest to page one by missed clicks; its first run flagged 75 CarLens pages within reach of page one.

Multi-agent listing-data pipeline (in progress) — scraper and writer agents collecting 30 days of Kijiji used-car listings to measure local pricing and recurring scam patterns.

SKILLS

AI & build Claude Code (AI-assisted development) · LLM prompt and workflow design · multi-agent pipelines · Python scripts · React/TypeScript site work · data processing · JSON-LD schema · GitHub · Cloudflare
